## lotus PRO Cleans up with a Perfect Safety Score

*Recent performance lab tests by the Toxics Use Reduction Institute (TURI) on lotus® PRO revealed a perfect score of 50 for safety screening at the Surface Solutions Lab. Compared against conventional and green cleaners, lotus PRO more than held its own. lotus PRO was in fact the top performer. The liquefied ozone produced by lotus PRO is stronger and faster acting than chlorine bleach yet harmless to people and the environment as shown by its HMIS rating of 0/0/0/A.*

Lowell, MA (PRWEB) -- Recent performance lab tests by the Toxics Use Reduction Institute (TURI) on lotus® PRO revealed a perfect score of 50 for safety screening at the Surface Solutions Lab. The Institute located at the University of Massachusetts Lowell is dedicated to researching, testing, and promoting products which are alternatives to those containing toxic chemicals.

Further investigation and experimentation on lotus PRO by TURI showed remarkable results as a cleaning product. Compared against conventional and green cleaners, lotus PRO more than held its own. lotus PRO was in fact the top performer (vs. both QUAT and green cleaners) on glass and chrome surfaces with an efficacy rating of over 90%, while being an effective cleaning agent on all other surfaces tested.

The revolutionary patented technology used by lotus PRO turns simple tap water into liquefied ozone which reverts back into water and oxygen after its job is done, without fumes or residues. Liquefied ozone is nature's answer for heavy-duty cleaning. It also kills up to 99.999% of bacteria, as well as molds, fungi, and viruses. The liquefied ozone produced by lotus PRO is stronger and faster acting than chlorine bleach yet harmless to people and the environment as shown by its HMIS rating of 0/0/0/A. As an on-demand cleaner lotus PRO dramatically reduces carbon footprint; the product itself is carbon neutral with minimal need for packaging, shipping, storage, or disposal once purchased.

Not only is lotus PRO extremely safe (as witnessed by its perfect TURI safety score) but it meets or exceeds cleaning requirements on most commercial surfaces; lotus PRO is the leading chemical-free cleaning solution in the U.S.A. From a price, safety, and effectiveness perspective the lotus PRO is unique in today's marketplace. The product is available through distributors across North America. Please visit the company website <http://www.tersanoprofessional.com> for more information.

Tersano Inc. is a privately held innovations company based in Windsor, Ontario with offices and distribution centers throughout the United States. The company develops and manufactures lotus® and lotus® PRO products for consumer and commercial customers worldwide. The company is committed to advancing environmentally safe and healthy cleaning and sanitizing technologies.
